

[D. H. Brathwaite

XLVIII (a) — Cattle Egret: telephoto of the bird observed at Belfast, near Christchurch (taken 13/10/63, by which date it had pale buff crown, nape and hindneck).

[M. J. Hogg

XLVIII (b) — Pycroft's Petrel (*P. pycrofti*) on the forest floor of Marotiri (Big Chicken) in December 1962, when it was one of six species of tubinares coming ashore. Blue Penguins, tuatara and kiore also compete for burrow-housing.
