

NOTORNIS

In continuation of New Zealand Bird Notes.

Bulletin of the Ornithological Society of New Zealand.

(Incorporated.)

Registered with the G.P.O., Wellington, as a Magazine.

Edited by R. H. D. STIDOLPH, 114 Cole Street, Masterton.

Annual Subscription, 7/6 (Juniors, 5/-); Endowment Membership, 10/-;
Life Membership, £6/6/-.

OFFICERS, 1954-1955.

President—MR. H. R. MCKENZIE, Clevedon.

North Island Vice-President—MR. P. C. BULL, Lower Hutt.

South Island Vice-President—MRS. L. E. WALKER, Dunedin.

Editor—MR. R. H. D. STIDOLPH, 114 Cole Street, Masterton.

Treasurer—MISS N. MACDONALD, "Keppoch Lodge," Sale St., Howick, Auckland.

Secretary—MR F. M. Brookfield, 22 Benbow Street, St. Heliers, Auckland E1.

MR. L. GURR, Nelson; DR. R. A. FALLA, Wellington;

MR. E. G. TURBOTT, Auckland

Vol. 6 No. 3 Published Quarterly. JANUARY, 1955

CONTENTS.

	Page
Dispersal of N.Z. Gannets, by P. A. S. Stein and K. Wodzicki	58
Notes on the Birds of the Chatham Islands, by L. C. Bell	65
White-winged Black Terns at Waikanae, by C. A. Fleming	69
Observations on Diving of Australasian Gannet, by K. Wodzicki and F. H. Robertson	72
Little Egret near Auckland and in Far North, by H. R. McKenzie	77
The Birds of the Chatham Islands 1954 Expedition, by E. W. Dawson	78
A Colony of Buff-coloured Pukeko, by J. M. Cunningham	83
Classified Summarised Notes	85

ILLUSTRATIONS—Plate VI., Pyramid, Chatham Is. 82

Plates VII. and VIII.—Buller's Mollymawk.

Plate IX.—Vegetation and Birds on Forty Fours.

NOTES.—Falcon in Chatham Is., 57; Regional Organisers, 64; Appointment of Officers, 64; Correspondence, 64; Late Shining Cuckoo Record, 76; Donations Acknowledged, 82; Birds Nesting in Gisborne Harb., 84; Birds in Northland Waters, 84.

FALCON IN CHATHAM ISLANDS.—The former existence of the falcon (*Falco novaeseelandiae* Gmelin) in the Chatham Islands does not seem to have been recorded. Neither our Society's recent Check List nor Oliver's N.Z. Birds, records it from the Chathams. In the collection of the Canterbury Museum are several bones which are indistinguishable from those of skeletons of the New Zealand falcon. They are: Av. 5423, r. femur (probably collected by H. O. Forbes); Av. 7594, cranium and pre-maxilla, from the Kinsey collection; Av. 9814, pelvis, from the Fougare collection; Av. 9930, l. tibia, from the Jefferson collection; and Av. 11.367, a l. ulna, collected from Owenga by Jim Eyles in 1952. The fact that so few falcon bones have been found among the thousands of bird bones from the Chathams that I have examined would show that it was probably not plentiful there.—Ron. J. Scarlett, Christchurch.
