

N.Z. BIRD NOTES

Bulletin of the Ornithological Society
of New Zealand.

Edited by Professor B. J. MARPLES and Dr. R. A. FALLA.

Address communications to Professor Marples, The Museum, Dunedin.

Annual subscription, 5/-. Price to non-members, 2/- per number.

VOL. I—SUPPLEMENT.

ISSUED MARCH, 1946.

LIST OF THE BIRDS OF NEW ZEALAND.

. By

B. J. MARPLES.

Department of Zoology, University of Otago.

This list has been compiled solely for convenience, and is not intended as a contribution to any controversy on questions of classification. It is to be hoped that somebody will draw up a complete checklist in the not too far distant future, but in the meantime it was felt that a simple list would be useful. No authorities are given, and in some cases familiar names have been retained where the rule of priority may eventually demand their alteration. For the most part binomials are adhered to, but in the case of a few conspicuous subspecies such as the Tits, trinomials are used. For dimorphic species, such as the Fantail, both English names are given. Recently extinct species are listed in square brackets, introduced ones in ordinary brackets, and an attempt has been made to indicate the regions where the different species occur, where they breed, and whether they are merely stragglers.

The list is based on Oliver's "New Zealand Birds," 1930, and modified with reference to the works of Mayr, Peters, Wetmore and others. I am much indebted to a number of ornithologists for information and suggestions, and especially to Dr R. A. Falla and Mr C. A. Fleming, who went to a great deal of trouble, and without whose assistance the list would be far less valuable. They are not responsible for any errors or inconsistencies which may have arisen owing to arbitrary decisions in certain obscure cases which I have made myself.

ABBREVIATIONS:

Kermadec Islands	K.	Maquarie Island	M.
North Island	NI.	Campbell Island	Ca.
