#### A NATURALISTS' TOUR IN ICELAND

In July 1974 I was able to visit the extreme north-west cape of Iceland (Hornvík), just south of the Arctic Circle. The enormous precipitous teem with many million seabirds — in fact, all but one of the cliff-nesting arctic seabird species breed there. Phalaropes, Golden Plover and Curlew nest nearby, and White-tailed Eagles and a Gyr Falcon were seen in the district.

A specially conducted Naturalists' Camping Tour will be held in this remote area between 13 and 27 July 1975. The tour provides a rare opportunity for ornithologists to visit an arctic region at reasonable cost — the all-inclusive charge is £140 from London by air. For details write to me, Sandy Bartle, Ecology Div., DSIR, P.O. Box 30466, Lower Hutt, or to the organiser, Dick Phillips, Whitehall House, Nenthead, Alston, Cumbria CA9 3PS, U.K.
